

AK12H0523

HANDLE 0-I (0 12h - 60°) IP69K RED/YELLOW FOR SIZE D0, D1 PADLOCKABLE

Code	009AK12H0523
EAN	8430892313872

Product description

IP69K safety handle unit designed in accordance with the hygiene requirements of standard EN 1672-2. Composed of a pre-assembled handle unit and two fixing pieces. The pre-assembled handle consists of a red knob set in a yellow plate with a two-component inner gasket plus a compression gasket for fixing to the mounting surface. The pre-assembled handle has protruding screws to engage with a fixing piece located inside the panel. A second fixing piece is assembled to the front block of the switch to be able to mount it on the handle fixed to the panel. It uses high performance plastics with antimicrobial technology and is resistant to highly polluted environments. Extreme shock resistance. The two-component internal gasket eliminates friction wear and guarantees the protection level is maintained over time. The front plate has two holes to insert padlocks up to 8mm in diameter. For size D0 and D1 switches. Frontal pad printing 0-I (0 12h 60°).
